# Kenji Watanabe

Data Analyst

Email **kenji@kenjiwatanabe.ca**
Phone **+1 604 555 0123**
Portfolio **kenjiwatanabe.ca**
Location **Vancouver, BC**

## Skills

**Analysis**
SQL, Python (pandas, scikit-learn, statsmodels), R

**Reporting**
Power BI, Tableau, Excel

**Methods**
Regression, time-series forecasting, A/B testing, statistical inference

**Workflow**
Git, Jupyter, data documentation

## Education

**BSc, Statistics (Honours)**
Pacific Crest University
2020 – 2024, first-class standing

## Certifications

**Power BI Data Analyst (PL-300)**
Microsoft, 2024

**Google Data Analytics Certificate**
2022

## Volunteering

**Data volunteer**
Vancouver community food bank, 2023 to present: monthly demand dashboards for 14 depots

## Languages

| | |
|---|---|
| English | Fluent |
| Japanese | Fluent |
| French | Basic |

## Profile

Data analyst with two years of experience turning operational data into decisions that managers act on. Strong in SQL, Python and Power BI, with a statistics degree behind the methods. Looking for an analyst role where the analysis feeds straight into operations.

## Projects

### Transit ridership forecasting — Capstone, 2024

**Question** Which bus routes need more weekend service?
**Method** Time-series models on three years of ridership, weather and event data, built in Python with statsmodels and Prophet.
**Result** **6.8% forecast error** against 11.4% for the baseline; the findings were used in a campus service pilot.

### Student rent affordability map — 2023

**Question** Where is renting least affordable for students?
**Method** Open city data joined in SQL, mapped with GeoPandas and published as a Tableau Public dashboard.
**Result** **4,000+ views**, and the dashboard was featured in the student newspaper.

### Customer churn analysis — Coursework, 2023

**Question** Which customers are most likely to leave?
**Method** Logistic regression and gradient boosting, with SHAP to explain each prediction.
**Result** The top 20% of risk scores captured **63% of churners**.

## Experience

### Data Analyst — Jul 2024 – Present

Harbourline Logistics, Vancouver

- Built weekly KPI dashboards in Power BI used by six operations managers.
- Automated manual Excel reporting with Python, saving about 12 hours a week.
- Traced a routing issue through delivery-exception analysis, cutting late deliveries by 9%.

### Data Analyst Intern — May – Aug 2023

Cascadia Health Analytics, Vancouver

- Cleaned and linked 400,000 patient-visit records for a clinic-capacity study.
- Wrote SQL views reused by three analysts and presented findings to clinic managers.
